Fresubin®
Energy/ Energy Fibre

Meeting increased energy requirements

1.5 kcal/mL tube feed for patients with moderate energy needs and/or volume restrictions with or at risk of malnutrition

High in energy (1.5 kcal/mL)
With high quality milk protein with a mix of rapidly and slowly digested proteins
Rich in MCT (57% of fat) for easy absorption
With EPA and DHA from fish oil – known for their anti-inflammatory effects and immune function support
Fibre and fibre free version
Convenient EasyBag packaging

For Health Care Professionals only.
Prescribing information

Food for special medical purposes:
Nutritionally complete tube feed, high-caloric (1.5 kcal/mL), Fresubin® Energy Fibre free/Fresubin® Energy Fibre with fibre. Low in lactose and gluten. For the dietary management of patients with or at risk of malnutrition, in particular with high energy needs and/or fluid restriction.

Dosage:
Must be determined by the healthcare professional according to patients’ needs. Recommendation for complete: ≥ 1.5 L (2250 kcal)/day or supplementary nutrition ≥ 0.5 L (750 kcal)/day.

Important notes:

Instruction for use:
Recommended tube size: CH 5 for pump assisted feeding, CH 8 for gravity feeding. Store at room temperature. Once opened, use within 24 hours. Shake well before use! Do not use if bag is damaged or swollen or content is coagulated. Do not mix with drugs.

Contraindications:
Not suitable whenever enteral nutrition is not permitted such as in acute gastrointestinal bleeding, ileus and shock. Use with caution in severe organ failure with impaired metabolism and severe forms of malabsorption. Not suitable for patients with congenital inability to metabolise nutrients contained in Fresubin® Energy/Fibre Fibre.
